## TRANSMISSION LINE REBUILD PROJECT

**INDIANA MICHIGAN POWER**

An AEP Company

BOUNDLESS ENERGY™

Indiana Michigan Power (I&M) plans power grid upgrades to improve electric reliability for customers in northeast Indiana. The Fort Wayne-Richmond Transmission Line Rebuild Project involves updating about 140 miles of 138-kilovolt (kV) transmission line and upgrading two substations.

### WHAT

The project involves:

- Rebuilding approximately 140 miles of 138-kV transmission line
- Upgrading two substations

Company representatives plan to rebuild the transmission line in the existing right-of-way, although they might need to acquire new easements or supplement current easements to ensure the safe construction, operation and maintenance of the line.

### WHY

The improvements:

- Strengthen the local electric transmission system
- Reduce the likelihood of power outages
- Speed recovery of service when outages occur

### WHERE

The project area includes:

- Allen, Adams, Wells, Jay, Randolph, Wayne and Union counties
- Cities of Fort Wayne, Dunkirk, Union City and Richmond
- Town of Pennville

### PROJECT SCHEDULE

\*Timeline subject to change.

# TYPICAL STRUCTURES

Structure Height: Approximately 80 feet\*  
 Right-of-Way Width: Approximately 100 feet\*

\*Exact structure, height and right-of-way requirements may vary
